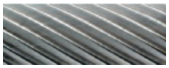
Information about different cuts

INOX: Outstanding milling performance in stainless steel as well as ferritic, austenitics and martenitic materials.

Aluminium: Suitable for aluminium and aluminium alloys as well as plastics.



DIN MY: For general purposes such as deburring, chamfering and smoothing edges with clean surface. Suitable for steels with high tensile strenght and welding seams.

Diamond: Suitable for hardened steels with excellent surface quality and welding seams with high tensile strenght.

DIN MX and DIN MX TiN: With this universal cutting profile even hardest materials andwelding seams can be machined with best finishing quality. Ideal for the tool and mould industry.
